

The Smarter Way to Control Your Inventory

Better inventory management begins with better visibility, and GovSmart empowers you with a real-time and accurate view into your inventory using Zebra barcoding and RFID technologies.

Our Zebra hardware and inventory management solutions help you locate and track all your inventory for increased accuracy and availability as well as reduced carrying costs and over-ordering.

Zebra Barcoding and RFID Technologies from GovSmart

- Automatically track all of your inventory and assets
- Control your inventory levels with accurate data
- Increase visibility into your inventory and costs
- Maintain ideal stock levels for each item and location
- Eliminate over-ordering, out-of-stocks, and inventory errors
- Track real-time item locations with RFID
- Streamline inventory transactions and cycle counts
- Automate your receipts and movement transactions
- Replace inefficient, error-prone spreadsheets and manual data entry
- Easily maintain supplier information for each item

Barcode Label Printing

Print barcode labels on demand with fast and high-quality output and easy remote management.

Barcode Scanning

Capture barcodes, documents, signatures, and more with 1D/2D scanning and imaging technology.

RFID Tracking

Locate and track your inventory wirelessly and remotely with RFID tags, printers, and readers.

Tablet Computing

Mobilize your workflows with high-powered touch computing and barcode scanning in a tablet device.

Our Recommended Zebra Solutions

LS2200 Series Scanners

Affordable and general-purpose scanning housed in an ergonomic and lightweight device.

DS8100 Series Scanners

Unprecedented 1D/2D scanning performance available in a corded or cordless handheld imager.

3600 Series Ultra-Rugged Scanners

Nearly indestructible 1D/2D barcode scanner and imager engineered for the toughest environments.

RFD8500 RFID Sled

The simple and easy way to add RFID and 1D/2D barcode scanning to third-party mobile devices.

FX9600 Fixed RFID Reader

Top-of-the-line RFID reading performance designed for high-volume and rugged environments.

MC3300R RFID Reader

Best-in-class long-range UHF RFID reading housed in an easy-to-use Android touch computer.

ZD620 Series Desktop Printers

Maximum print quality, efficiency, and manageability in a desktop barcode printer.

ZD500R Desktop RFID Printers

Desktop UHF RFID printing in a small, easy-to-use device designed for convenient, simple operation.

L10 Series Tablets

Rugged tablets that offer government-grade security and more processing power, memory, and battery life.

About GovSmart

GovSmart is an information technology solution provider serving the U.S. Department of Defense, civilian, and intelligence agencies for more than 10 years. With SBA HUBZone socioeconomic designation as well as OMB authorization and manufacturer certifications, we're prepared to meet all your IT needs and help you design, procure, and implement industry-leading technologies.
